March 2005**

EXPOSURE DRAFT—March 2005

March 2005

TO: Members of Actuarial Organizations Governed by the Standards of Practice of the Actuarial Standards Board and Other Persons Interested in the Selection of Economic Assumptions for Measuring Pension Obligations

FROM: Actuarial Standards Board (ASB)

SUBJ: Proposed Revision of Actuarial Standard of Practice (ASOP) No. 35

This booklet contains the exposure draft of the proposed revision of ASOP No. 35, *Selection of Demographic and Other Noneconomic Assumptions for Measuring Pension Obligations*. Please review this exposure draft and give the ASB the benefit of your comments and suggestions. Each written response and each response sent by e-mail to the address below will be acknowledged, and all responses will receive appropriate consideration by the drafting committee in preparing the final document for approval by the ASB.

The ASB accepts comments by either electronic or conventional mail. The preferred form is e-mail, as it eases the task of grouping comments by section. If you wish to use e-mail, please send a message to **comments@actuary.org**. You may include your comments either in the body of the message or as an attachment prepared in any commonly used word processing format. Please include the phrase “ASOP No. 35 Revision” in the subject line of your message.

If you wish to use conventional mail, please send comments to the following address:

ASOP No. 35 Revision
Actuarial Standards Board
1100 Seventeenth Street, NW, 7th Floor
Washington, DC 20036-4601

Deadline for receipt of responses in the ASB office: **October 31, 2005**

Background

The Actuarial Standards Board adopted the existing ASOP No. 35 in 1999 as one of several standards designed to provide guidance on key elements in measuring pension obligations. In March 2005, the ASB approved the second exposure draft of a proposed revision of ASOP No. 4, *Measuring Pension Obligations and Determining Pension Plan Costs or Contributions*, which will be the “umbrella” standard that addresses overall considerations in the selection of assumptions and methods for measuring pension obligations.

The existing ASOP No. 35 contains a statement to the effect that, in case of a conflict between the guidance in ASOP No. 35 and ASOP No. 4, ASOP No. 35 will govern. However, the ASB intends that the proposed revision of ASOP No. 4 should govern in any such conflicts, and the

EXPOSURE DRAFT—March 2005

proposed revision of ASOP No. 4 does conflict with ASOP No. 35 in one substantive way. The ASB is not releasing a complete version of ASOP No. 35 and is not soliciting comments on other issues at this time. Instead, this exposure draft highlights only the wording changes that will be made to resolve the conflict regarding which standard governs. A more comprehensive review is intended for the future, at which time readers would be encouraged to comment on all aspects of the standard.

The ASB plans to adopt this proposed revision of ASOP No. 35 with the same effective date as the proposed revision of ASOP No. 4.

The following changes are proposed:

1. In the transmittal memorandum, delete the second paragraph, which states, “This standard expands upon and, in some areas, modifies ASOP No. 4, *Measuring Pension Obligations*. It also provides an alternative way to comply with the disclosure of exceptions requirement in ASOP No. 2, *Recommendations for Actuarial Communications Related to Statements of Financial Accounting Standards Nos. 87 and 88*, insofar as it pertains to demographic or other noneconomic assumptions.”

In addition to that specific change, the ASB might make other nonsubstantive changes in the transmittal memorandum to reflect the current format of ASOPs and the current status of ASOP No. 4, ASOP No. 27, and the proposed ASOP on the selection and use of asset valuation methods in pension valuations.

2. In section 1.2, *Scope*, revise the first sentence of the third paragraph to state explicitly that ASOP No. 4 will govern in the event of a conflict and delete the second sentence entirely. These proposed changes are shown below:

- 1.2 Scope—This standard applies to actuaries when they are selecting demographic and all other assumptions not covered by ASOP No. 27, *Selection of Economic Assumptions for Measuring Pension Obligations*, to measure obligations under any defined benefit pension plan that is not a social insurance program as described in ASOP No. 32, *Social Insurance* (unless an actuarial standard of practice on social insurance explicitly calls for application of this standard). Measurements of defined benefit pension plan obligations include calculations that assign plan costs to time periods, actuarial present value calculations, and estimates of the magnitude of future plan obligations. Measurements of pension obligations do not generally include individual benefit calculations or individual benefit statement estimates.

Throughout this standard, any reference to *selecting* demographic and other noneconomic assumptions also includes *giving advice on selecting* demographic and other noneconomic assumptions.

EXPOSURE DRAFT—March 2005

To the extent that the guidance in this standard may conflict with ASOP No. 4, ~~this standard~~ ASOP No. 4 will govern. ~~Furthermore, compliance with section 4.2 of this standard is deemed to fully satisfy the disclosure of exceptions requirements of ASOP No. 2, Recommendations for Actuarial Communications Related to Statements of Financial Accounting Standards Nos. 87 and 88, and of Actuarial Compliance Guideline No. 2, For Statement of Financial Accounting Standards No. 88, insofar as they pertain to prescribed demographic and other noneconomic assumptions.~~

When applicable law, regulation, or other binding authority conflicts with this standard, complying with such law, regulation, or other binding authority shall not be deemed a deviation from this standard.

This standard does not apply to the selection of an assumption where the actuary is precluded from exercising independent judgment by an applicable law, regulation, or other binding authority (i.e., when a specific assumption is mandated or when only a specified range of assumptions is deemed to be acceptable). For example, this standard does not apply to the selection of a current liability mortality assumption under Internal Revenue Code (IRC) section 412, because the mortality assumption is governed by the IRC and regulations.

The ASB reviewed the draft at the March 2005 board meeting and approved its exposure.
